

# Repeat Signage helps promote tourism in the Greek island of Amorgos

*Foritos* is an Internet and Information spot in a small Greek touristic island called Amorgos.

In antiquity Amorgos was one of the first places from which the Ionians passed onto the Greek mainland.

*Foritos* - an Internet and Information spot in the Greek island of Amorgos

“We use the standard version of Repeat Signage, providing our clients with the opportunity to learn about our offers through .ppt slide shows, get information about the weather through iframes, and also watch a travel guide video with the sights of the island.”

“In that same image we inform the public through RSS feeds on bus schedules as well as news from Greece and abroad.” Spyridon Tsimelas, *Foritos*

Repeat Signage digital signage software helps you get your message across to promote your product or service. It is easy to use and you can create a presentation and have it playing in minutes. You just need a Windows based PC, a large display screen and Repeat Signage. Features include touch screen support, remote updating and scheduling of presentations, and it supports Windows 10, 8/8.1, 7, Vista and XP.

You can create RSS news feeds that contain Unicode characters so that Greek and other country characters are displayed on screen.
