# Repeat Signage showcases Unicol's new mounting solutions at ISE 2015 on a freestanding Rhobus 2x2 video wall

Unicol showcased their new products at ISE 2015 in Amsterdam, including their Jazz touch table, Huddle collaborative table and freestanding Rhobus 2x2 video wall mounting solution.

The Unicol Rhobus 2x2 video wall mount has supporting arms for four display screens and lockable space at the rear for cable management with room for a small signage player.

Using Repeat Signage 'Create Repeat Picture' control and selecting an Advert template, Unicol product images were inserted into the template, which then allowed text to be placed over pictures, as shown above. Next, the Unicol logo and contact details were inserted into the horizontal banner below the pictures and the whole advert saved as Unicol-advert1.rpic

Repeat Signage digital signage software, powered by an Edis mini PC, played presentations promoting Unicol's new products onto four Samsung large format displays supported by Unicol's Rhobus 2x2 freestanding mounting solution.

Once a number of Repeat Picture adverts had been created and saved, it was a simple matter to create a new presentation and, using the Flash banner control, insert all the Repeat Pictures (.rpic). The fade transition was chosen and timing set to display a new advert every 10 seconds.

The Repeat Signage presentation was saved onto the Edis mini PC which was connected, via HDMI cable, to the first display screen. We connected a keyboard and mouse so we could view the presentation playing on screen. As the four screens were daisy chained together, the presentation played across the whole of the video wall. The keyboard and mouse were then disconnected and the Edis player safely locked inside the rear of the Rhobus stand, leaving the presentation playing continuously throughout the three day exhibition, showcasing Unicol's mounting solutions.

Repeat Signage Standard edition digital signage software is designed for a single display screen. You can download a trial edition. View a 2 minute video to create and play presentations.

Repeat Signage Professional edition is designed for 4-screen video walls and you can display the same or different content across the video wall or on individual screens. Repeat Signage licence is per PC playing presentations and is a one-off fee unless you decide to upgrade. Both editions allow scheduling and remote updating from anywhere in the world.

RepeatServer.com is a free service that allows you to create and host RSS feeds online, free of charge.   You can use these for your websites, with desktop RSS readers or in digital signage software. Our news feeds can support Chinese, Japanese, Russian, Greek and other characters. RepeatServer.com was designed with users of Repeat Signage digital signage software in mind so that you can create, host and maintain RSS feeds to be displayed on LCD monitors in public areas. This online portal provides a way for Repeat signage digital signage screens to be updated from anywhere in the world.
