Repeat Signage V4

> Truly flexible digital signage software for Windows

Repeat Signage™ digital signage software helps you get your message across and promote your own products or services.

It is easy to use and you can create a presentation and have it playing in minutes.

You just need a Windows based PC (or Windows media player), a large display screen or touch screen and Repeat Signage.

Why Repeat Signage? The Repeat Software team will give you an outstanding level of support. We give you free [training videos](#), [sample presentations](#), [email support](#) and we have [satisfied customers](#) across the world. [Trial download](#). www.repeatsoftware.com

Repeat Signage V4

> **WYSIWYG designing (What you see is what you get)**

With Repeat Signage™, you design your presentation for the resolution of your screen in landscape or portrait.

Picture courtesy of Sharp Electronics

For example, you may want to display information in

reception area or restaurant on an HD display screen which has 1920x1080 pixels. Repeat Signage allows you to design on this screen in full screen

mode letting you place pictures, text, shapes, text over pictures, icons, real-time Flash clocks and date, videos, PDF files, page-turning PDFs, Word documents, Excel spreadsheets, PowerPoint files, web browser, webcam, etc., exactly where you want them, easily moving and resizing. Repeat Signage supports Windows XP, Vista, 7, 8/8.1 and Windows 10.

“Support has been excellent and I have never been disappointed. Quick response times along with personal service, rates this company very high in my personal satisfaction. I have, and will continue to recommend this company to others.” Justin McNaughton, Information Technology Specialist, Harrisburg International Airport, Central Pennsylvania.

> Repeat Signage digital signage software solutions

To create a presentation, start with a template, or a blank workspace and insert your logo, pictures, text, RSS newsfeed, videos and other media exactly where you want them.

Picture right shows a simple presentation in portrait mode with logo, date and real-time, text, a scrolling message and a play list of images with descriptions. The A&E waiting time is stored in a simple .txt file, which can easily be updated by the receptionist.

“At Caxton House, the corporate Head Office of our company and home of Caxton Magazines, we replaced our messy stick-on notice boards with electronic notice boards, using Repeat Signage Standard Edition digital signage software. We make use of RSS feeds a lot, also using the RSS feed facility provided by Repeat Signage for quick editing and displaying our company, staff and building related information and announcements - even birthdays and canteen specials!” Riaan Harttingh.

>Repeat Signage V4 digital signage software

Benefits of Repeat Signage V4 software

The Repeat Software team, UK developers of Repeat Signage™ digital signage software, believe that customers should be able to update their presentations remotely over the Internet without having to pay subscriptions.

Repeat Signage V4 software licence is a one-off fee, unless you decide to upgrade. You have a choice of how to update the content in your presentations, either from a shared network drive, from a website, via .FTP or remotely over the Internet from anywhere in the world (with an Internet connection), using our free online portal RepeatServer.com

RepeatServer.com - Free RSS creation and hosting

This free and secure service allows you to create a news feed for your organisation and the news can then be scrolled along the bottom of your digital signage screens. Your news can be updated remotely from anywhere in the world. Change the news online and it changes on your screen in seconds. RepeatServer.com also facilitates the remote updating of Repeat Signage including text and pictures displayed on your screens, free-of-charge. Plus, over 3,000 images for you to use in your Repeat Signage presentations.

You can also generate an income by easily creating adverts from our advert templates, for example, a hotel advertising spa products or wedding fayres. Repeat Signage™ supports Unicode for displaying German, Greek and other country characters.
