

# Watergate Apartments communicate important information to over 1,000 residents in their complex with **Repeat** Signage software

Watergate Apartments at Waterview Walk, Docklands in Melbourne, is a luxurious, sustainable community building. Facilities for over 1,000 residents, include a gym and outdoor recreation area, a swimming pool and business centre, lobby for the enjoyment of all residents, bicycle racks and car parking. An architect's vision come to fruition, you can view pictures and news at their website [www.watergate.net.au](http://www.watergate.net.au)

“Business Manager, Marshall Delves, is very happy with the display signage solution, software provided by Repeat Software and hardware implemented by DockCom Technology Services.

There are 2 displays installed at the lifts in 2 residential towers that display public notices, weather, latest news, etc. They are used to communicate important information to over 1,000 residents in the complex.

Marshall Delves, the building manager, finds Repeat Signage software very user-friendly. He frequently uploads public notices via Dropbox, and it makes it very useful that they get automatically displayed almost instantly.

From a technical perspective, DockCom Technology Services, as an integration and signage installation specialist, find Repeat Signage software an excellent choice of reliable software with an extensive feature range, suitable for many applications. Most importantly, we find that clients like the software and find it easy to use.” Mark Stytsenko, Technical Director of DockCom Technology Services.

**WATERGATE**  
Why do our lifts break down so often?

One, the lift servicing company, says that Watergate lifts break down more often than they should. The main reason for lift failure is the use of objects or feet to hold the doors open. **Please don't do this!** Any pressure applied to the doors near the floor level throws the doors out of alignment. With frequent misuse the doors eventually jam. Please use the "Doors open" button. Do not use your feet or items such as suitcases to block the door. Every technical service call costs hundreds of dollars and more on weekends. Please help us control these costs and reduce inconvenience to residents.
