

YOWI Deli serves up digital menu boards with **Repeat Signage**

“YOWI Deli is a quick service food outlet located in a food court in Singapore. Being a new set up, I anticipated that the menu would keep evolving as I worked out what my customers liked and decided to bite the bullet and purchase a digital signage system. Having used Repeat Signage for six months now, I now feel that it is worth its weight in gold!” Jason Thai, YOWI Deli.

“Using Repeat Signage in a F&B environment has given me flexibility in my operations and allows me to change my menus and promotions almost instantly without undue costs. (Installing a HDMI splitter has helped to stretch my investment further by allowing content to be repeated on more than one screen.) Using a combination of MS Publisher to lay out my menu and Repeat Signage’s rich features, I am able to produce eye catching menus and advertisements which help drive traffic to my outlet. I am also able to automatically switch between breakfast, lunch and dinner menus using the built-in playlist feature so I don’t have to worry about manually switching them on time.

I was able to save even more money by using a PC motherboard with 3 video outlets. Repeat Signage does not have extremely high computing overheads so I use 2 screens for Repeat Signage screens and 1 for my admin work all on the same PC! I am able to run Repeat Signage, a F&B costing program, a labelling program, MS Outlook, MS Publisher and MS Excel simultaneously without any performance issues.

Repeat Signage has been a real help in saving me time and money while helping to attract more customers to my store. Thanks Repeat Software!” Jason Thai, YOWI Deli, Singapore.
